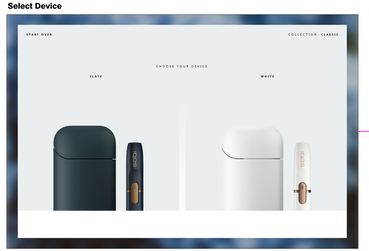
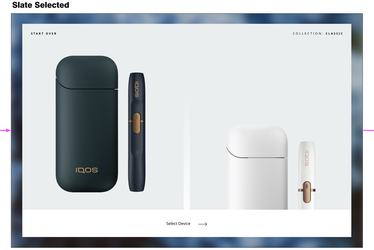
Adding/clearing a monogram

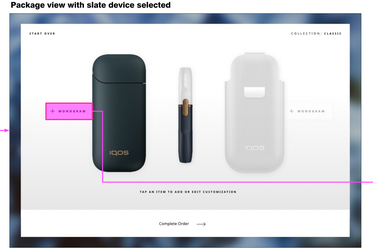
Select Device



Slate Selected

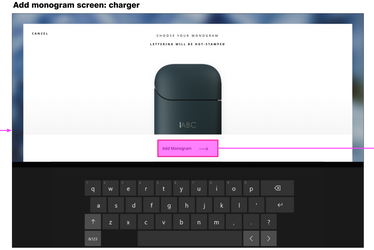


Package view with slate device selected

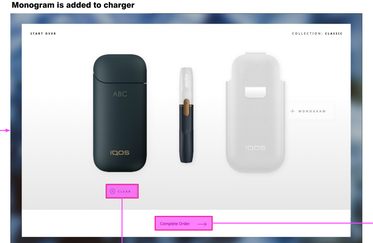


Only "Add Monogram" button for charger is active, because a color has been selected for it. For the pouch, the "Add Monogram" button is inactive because a color **has not** been selected.

Add monogram screen: charger

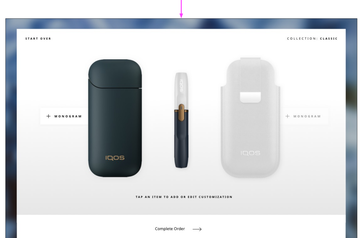


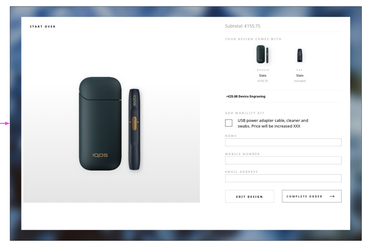
Monogram is added to charger



Clear button below charger now appears because a monogram has been added. The charger is the core part of the experience. It cannot be removed.

For charger, tapping the clear button only removes monogram. Tapping on charger object will allow user to edit color selection





If user does not select a cap color or pouch color in Package View, use default selections for base device selected. Here, base device selected is Slate. Therefore, default selections would be Slate Charger and Slate Cap. If base device is White, default selections would be White Charger and White Cap.
